## Commitment to achieving Net Zero

Van Bael & Bellis is committed to achieving Net Zero emissions by 2050.

## Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions.

Baseline emissions are the reference point against which emissions reduction can be measured.

## Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets:

- Transition from traditional lighting to energy-efficient LED lights to reduce electricity consumption.
- Implementation of a structured recycling programme for printing toners and other office supplies to minimise waste.
- Offsetting carbon emissions from all business-related travel through verified compensation programmes (via our travel agency).
- Efforts to switch to renewable energy sources for office operations, dependent on building management approval.
- Adoption of recycled materials for office supplies and branded materials to lower environmental impact.
- Requesting proof of sustainability practices from suppliers to ensure responsible sourcing and procurement.

We project that carbon emissions will decrease over the next five years to 500.05 tCO<sub>2</sub>e by 2030. This is a reduction of 50% compared to a 2019 base year.

We project that emissions will reduce to 681.88 tCO<sub>2</sub>e by 2026. This is a reduction of 32% compared to 2019.

Progress against these targets can be seen in the graph below:

**Carbon Reduction: Projected vs. Actual**

**Carbon Reduction Projects**

**Completed Carbon Reduction Initiatives**

The following environmental management measures and projects have been completed or implemented since the 2019 baseline. The carbon emission reduction achieved by these schemes equate to 324 tCO<sub>2</sub>e, a 32%ge reduction against the 2019 baseline and the measures will be in effect when performing the contract

In the future we hope to implement further measures such as:

- Select tier 1 suppliers with carbon reduction plans and/or adhering to SBTi.
- Reduce consumption of high-carbon products and services.
- Opt for economy class for long-distance business travel and further reduce travel.
- Promote EV/public transport and bike for commuting of employees.
- Source renewable electricity in all offices that we lease.
