

## Sixth edition “EU Anti-Dumping and Other Trade Defence Instruments”

The definitive book on EU trade defence law appears in a fully updated sixth edition. As comprehensive in its coverage as its predecessors, this new edition of the Van Bael & Bellis book on “EU Anti-Dumping and Other Trade Defence Instruments” provides incisive analysis and critical commentary on all relevant aspects of the EU trade defence instruments as actually applied by the EU Institutions against the backdrop of WTO law.

The book covers every issue likely to arise in any trade defence matter and examines the numerous cases decided under the EU anti-dumping, countervailing, safeguard and trade barriers regulations. The emphasis throughout is on the practical application of the rules.

Van Bael & Bellis is recognised by leading legal directories as first in Europe in the area of trade law, offering the most extensive experience in international trade cases. The firm advises companies, governments and trade associations involved in anti-dumping, anti-subsidy, safeguard and other trade matters throughout the world.

In the field of EU anti-dumping, Van Bael & Bellis has an unmatched level of experience: as of February 2019, the firm has handled more than 400 EU anti-dumping proceedings representing exporters, importers and users of the relevant targeted products. Van Bael & Bellis has also been involved in most of the less frequently initiated EU anti-subsidy and safeguard proceedings.

Reflecting decades of experience, this book is the preeminent work in the field. Lawyers and academics involved in trade matters will discover that “EU Anti-Dumping and Other Trade Defence Instruments” remains without peer as a guide to EU trade defence law.

You can order the book through this [link](#).
