“EU Anti-Dumping and Other Trade Defence
Instruments”**

The sixth edition of the Van Bael & Bellis book on “EU Anti-Dumping and Other Trade Defence Instruments”, published by Kluwer, has just been released.

The book covers every issue likely to arise in any trade defence matter, including all of the following and more:

- determination of the dumping and injury margins;
- rules for permissible adjustments;
- clarification of the terms ‘significant distortions’ and ‘distortions on raw materials’;
- determination of the subsidy margin;
- the causal link between dumping or subsidy and injury;
- the concept of EU interest;
- the differences between anti-dumping and anti-subsidy legislation;
- procedural rules applicable to complaints, initiation of proceedings, investigations, protective measures, reviews and refunds;
- conditions for accepting an undertaking;
- measures that may be taken to prevent ‘circumvention’ of anti-dumping or countervailing measures;
- rules governing the standing of various interested parties before the European Courts;
- allocation and administration of quantitative quotas; and
- surveillance measures.

As a detailed and practical commentary on all the relevant aspects of the EU trade defence instruments as actually applied by the EU institutions against the backdrop of WTO law, the sixth edition of this book remains without peer as a guide to EU trade defence law.
